## Opis produktu

Perhaps, anyone who has ever watched the sun rising probably felt a burst of energy and inspiration. This wonderful moment when the first rays of light cut the darkness and gloom of the night evokes awe in the heart and fills it with hopes. The generous sun gives us a huge energy boost for the whole day.

This is the mood that inspired the creation of MS-1085 GOLD speaker system! The appearance of the system is like early morning giving peace and serenity. Golden round-shaped decorative elements on the glossy black background of the satellite and subwoofer front panels make you recall a sunrise. The system treats all the music genres extremely gently. Any piece of music, be it a lyrical classical composition, rock'n'roll or sophisticated jazz, sounds perfectly clear and distinct when it reaches the listener's ears. The two-way satellite speakers provide detailed reproduction of the highs.

Do you want to feel the bass guitar and percussion part more deeply? Adjust the bass with the knob on the subwoofer rear panel. Owing to the bandpass enclosure of the subwoofer, the system playbacks any melody with rhythm and drive. It has a "heart" of 46 W inside. In order to create comfortable relaxed atmosphere, just turn the volume slightly down using the wired remote control. The remote control is equipped with a headphones jack. Just one click – and the system is ready to operate in the individual mode.

Communicate, explore, enjoy, plan your goals and achieve them! MS-1085 GOLD system will be a great help in this! It's so nice to spend your time at home or at work accompanied by the sound of your favorite tunes! The RCA connector on the subwoofer rear panel enables you to connect various audio devices (PC, laptop, DVD player, smartphone, etc.) and implement a lot of entertainment opportunities: starting from watching movies and listening to music to sounding computer games!

## Specyfikacja produktu:

Producent SVEN
Model MS-1085 Gold
Total output power (RMS), W 46
Output power (RMS), W subwoofer: 20
satellites: 26 (2 × 13)

Frequency range, Hz subwoofer: 40 – 150
