Opis produktu

Toy cars, doggies, cherubs, bear-cubs. What is the common thing between these words? It appears that all the above-listed are the models of speaker systems for PCs and notebooks. Striking appearances turn these devices in an unusual solution for the worktable; however, the sound in such devices leaves something to be desired. When you are bored with the "teddy" sound, then you remember with nostalgia about the classics: rectangular shapes, wooden cabinets and two-way satellites.

SVEN Company presented the next designer solution of SVEN MS-1090 multimedia speaker system, i.e. SVEN SPS-619. This light-version is a compact speaker system with convenient control panel on the side wall of the active speaker. The model designed in a spirit of minimalism combines functionality, splendid specifications and the stylish design.

SVEN SPS-619 can be attributed to the classic solution of speaker systems, which is the incarnation of the most necessities for movies sounding, computer games and listening to musical tracks on PC. Compact dimensions allow placing speakers on the worktable next to the monitor without any inconvenience for the user. Black glossy surface and silvery elements (made in imitation of metal) on the front panels match the design of modern monitors. A separate tweeter reproduces all tinges of the vocal, stringed instruments and percussion very cleanly, at that the tone control allows correcting the saturation of high-frequencies making the sound more explicit.

It is noteworthy that cabinets of speakers are wooden (MDF). This allows suppressing different sound distortions related to physical laws of sound-wave propagation in the closed space. As the result, the sound becomes purer and more natural.

The control panel is located on the side wall of an active speaker for the sake of convenience. It has the volume control of the system, as well as the treble control. Taking into consideration the computer orientation of the speaker system, there is the headphones jack on the panel conveniently.

As the result, SVEN SPS-619 is an affordable functional upgrade for your PC with the design inviting to the eye and the convenient set of control options.

Specyfikacja produktu:

Producent SVEN

Model SPS-619

Output power (RMS), W 20 (2 × 10)

Frequency range, Hz 70 - 22,000

Tweeter diameter, mm Ø 25

Woofer diameter, mm Ø 76

Magnetic shielding yes

Power supply ~220 V / 50 Hz

Case material wood (MDF)

Dimensions, mm 115 × 200 × 130

Weight, kg 2.35

Color czarno-srebrny

Wersja opakowania BOX
